DynoGrip® Evolution® FR

DynoRaxx®
SUPPORTING YOUR INVESTMENT®

DynoGrip® Evolution® FR delivers a tool-less ballasted racking system for mounting PV solar panels on flat roofs and surfaces. The proprietary design of the DynoRaxx® ballasted-racking system has been created to simplify and speed installation without compromising quality or performance. With DynoGrip® Evolution® FR, buying commercial solar panel racking has never been more cost effective.

Dy·no·Grip

Noun \ˈdī- nō-ˈgrip \

: the greatest, tool-less mounting system for solar modules ever created

Ev·o·lu·tion

Noun \e-və-ˈlü-shən\

: a process of continuous change from a lower, simpler state, to a higher, more complex, or better state
: growth

- Does Not Require Tools for Installation
- Three Components – Two Major
- Space-Saving Reverse Basket Design
- Rugged Construction
- Universal Design/ Accommodates all framed modules

Innovative Design

- Fiberglass
- Proprietary racking enables fast installation in less than half the time of other systems
- Versatility to accommodate all framed PV solar panels on the market
- Eliminates need to penetrate roof with fasteners on most installations
- Smaller footprint than competitive systems, saves roof space and adds flexibility
- Up to 10 Degree tilt available
- Elevated system; does not impede water drainage
- Non-corrosive
